

Overview - 7465-240-1113

This report uses data gathered locally via social media, sentiment analysis, JTOKENS, and then runs this through the OpenAI API to determine if your personality is suitable to work in information security. This model uses data from Indeed, LinkedIn, and Monster matching traits seen by hiring managers that are shared by their most successful team members. It uses a proprietary algorithm to determine traits of individuals that will be high performers. Below are common traits attributed to successful individuals in your Information Security.

Creativity

- You prefer a certain amount of change and variety and become dissatisfied when hemmed in by restrictions and limitations.
- At times you are extroverted, affable, and sociable, while at other times you are introverted, wary, reserved.

Dependability

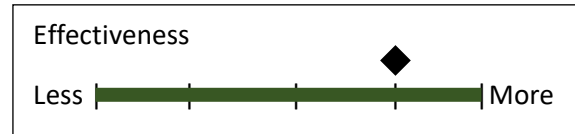

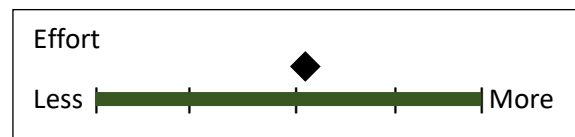

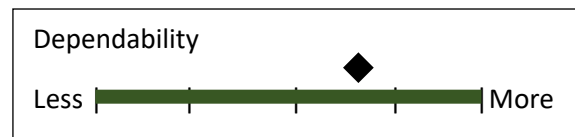

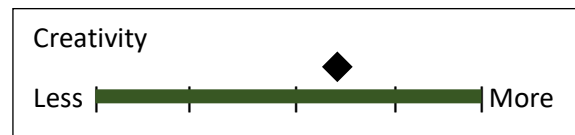

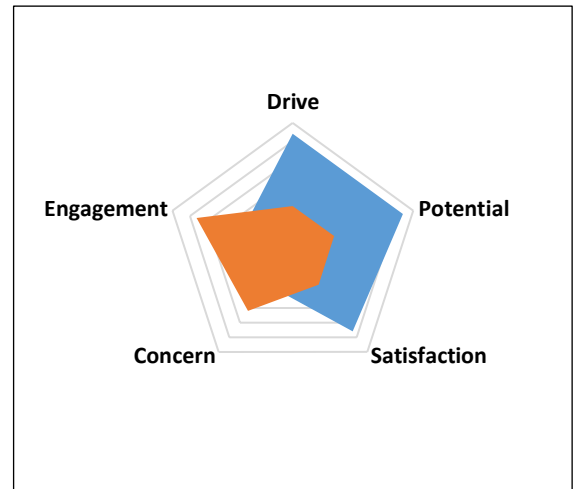

- Disciplined and self-controlled outside, you tend to be worrisome and insecure inside.
- Personal and financial security is one of your major goals in life

Effort

- You have a great deal of unused capacity which you have not turned to your advantage.
- You pride yourself as an independent thinker and do not accept others' statements without satisfactory proof.

Effectiveness

- At times you have serious doubts as to whether you have made the right decision or done the right thing.
- Some of your aspirations tend to be pretty unrealistic.
- You have a tendency to be critical of yourself.
